Action Plan to create conditions for the adoption of integrated care in XY region
Improvement of XY dimension¹ of integrated care

Background: The objective of the Action Plan is to reflect on the possibility to transfer and adopt the learning about the XY dimension of integrated care to local settings in XY region, including the feasibility of the transfer and recommendations on policy priority actions that would enable the creation of local conditions for the adoption of integrated care.

The Action Plan builds on the outcomes of the study visit organised in XY on XY. The study visit was an opportunity to learn about the XY dimension and di learning by comparing and contrasting the maturity of the the maturity of local health and social care system in Y regi SCIROCCO self-assessment tool which provided the basis activities.

For the purpose of SCIROCCO Action Plan the transferring region is a region/authority which already has made progress on implementing integrated care and which possesses essential know-how and good practice. This region will act as a "coaching" partner in the knowledge transfer activities.

The Action Plan are co-designed jointly with the transferring² and receiving³ region as follows:

- **Section 1:** Needs of the adopting region - **Receiving region**
- **Section 2:** Description of the integrated care solution - **Transferring region**
- **Section 3:** Maturity requirements of the integrated care solution - **Transferring region**
- **Section 4:** Benefits and opportunities of integrated care solution - **Receiving region**
- **Section 5:** Conditions for the adoption of integrated care solution - **Receiving region**
- **Section 6:** Adaptation of local environment to enable the transferability of learning - **Receiving region**
